

DESHAN FERNANDO

Software Engineer | Backend & Full-Stack

Colombo, Sri Lanka | +94 76 910 6285 | deshanfernando67@gmail.com

github.com/deshanFdo | linkedin.com/in/DeshanFdo31 | deshanfdo.github.io/Portfolio

PROFESSIONAL SUMMARY

Computer Science undergraduate with 11 months of internship experience building production backend services at Sri Lanka Telecom. Skilled in REST API design, ~30% endpoint performance gains, JWT/RBAC security, and scalable multi-tenant systems. Comfortable in Agile teams across estimation, development, and stakeholder communication. Seeking a Software Engineer role on a product-focused engineering team.

EXPERIENCE

Software Engineer Intern, Sri Lanka Telecom

Jun 2025 – May 2026

Colombo, Sri Lanka

- Designed and maintained RESTful backend services (Node.js/TypeScript) for an internal assessment platform; managed ~100,000 marked rows of assessment data.
- Implemented RBAC and panel-level data isolation, securing 1M+ assessment records across multiple tenant organizations; optimized MySQL queries and indexes, reducing API response times by ~30% under production load.
- Developed reusable React components and refactored assessor-facing workflows, improving page load performance and reducing UI bug reports.
- Collaborated in Agile sprints (Jira): clarified user stories, contributed to effort estimates, participated in code reviews, and demoed features at sprint reviews.

PROJECTS

LawLinkLK — Client & Lawyer Connecting Platform

- Built and deployed a full-stack web app for real-time lawyer-client messaging, appointment scheduling, and document sharing; integrated an AI-powered legal assistant to reduce initial consultation overhead.
- Engineered the backend with Node.js/Express and MongoDB, implementing JWT authentication, role-based middleware, and Socket.IO for live chat with 50ms latency.
- Tech:** React, Node.js, Express, MongoDB, Socket.IO, Tailwind CSS, JWT

Enterprise Developer API Portal

github.com/deshanFdo/apiPortal

- Full-stack real-time dashboard aggregating Weather, Stock Market, and Cryptocurrency data from 6+ external APIs; implemented enterprise API gateway patterns with WSO2 API Manager, JWT validation, and OpenAPI 3.0 specs.
- Set up CI/CD with GitHub Actions; built multi-API fallback logic to maintain 99%+ demo uptime.
- Tech:** React, Vite, Node.js, Express, WSO2 API Manager, Docker, GitHub Actions

AI Floorplan-to-3D House Generator

- Multi-stage ML pipeline converting 2D floorplan images into 3D-ready geometry; Python/FastAPI backend for model inference and caching, paired with a React (Vite) frontend for job management.
- Tech:** Python, PyTorch, Ultralytics YOLO, FastAPI, React, Vite

E-Commerce Microservices Platform

- Architected a Spring Boot backend decomposed into RESTful microservices for product catalog, identity, and orders; integrated Redis caching and RabbitMQ for async event processing on AWS EC2.
- Tech:** Java, Spring Boot, PostgreSQL, Redis, RabbitMQ, Docker, AWS EC2

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs, JWT, RBAC, WebSockets

Frontend: React, Vite, HTML5, CSS3, Tailwind CSS

Databases: MySQL, MongoDB, PostgreSQL, Redis

DevOps & Tools: Docker, GitHub Actions (CI/CD), Git, Postman, Jira, Linux, AWS EC2

Practices: Agile/Scrum, OOAD, OOP, System Design (Basics), User Stories, Code Reviews, Unit Testing

EDUCATION

BSc (Hons) Computer Science — University of Westminster / IIT Sri Lanka

Jan 2023 – Present

Expected Graduation: May 2027

Foundation Certificate in Higher Education – IT (Distinction), IIT

Jan 2023 – Sep 2023

CERTIFICATIONS & ACHIEVEMENTS

- Postman API Fundamentals — Student Expert | Introduction to Databases for Back-End Development — Meta (Coursera) | Microsoft Azure Fundamentals (AZ-900)
- Team Leader, IEEE Xtreme Encode — placed 10th of 200+ teams, IEEE Region 10, Asia-Pacific, Jul–Sep 2024. Also competed in IEEE Xtreme (2025) and Hult Prize On-Campus (2026).
